Specification

The application is a translation from a foreign language and as such may include informalities inherent therewith. The disclosure should be reviewed to ensure it conforms to current U.S. practice.

Claim Rejections - 35 USC § 112

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. In addition, claim 3 cannot depend from itself. The "3" should be changed to --2--. Also, in claim 5, the dependency should be changed from "1" to --2-- for proper antecedent basis. The claims were examined as best understood.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Karmaschek. Karmaschek discloses an aluminum part with a titanium coating intended

to be welded to another part particularly in automobile manufacture. The titanium is provided in a chromium free acidic solution and applied to the aluminum part by contacting the solution for a sufficient amount of time. With the coating applied the contact resistance would inherently be lowered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-10 and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Karmaschek as applied to claims 1, 2 and 9 above, and further in view of Dash. Karmaschek does not specifically disclose the part to be welded being a weld stud. Dash discloses a stud for welding. At the time the invention was, it would have been obvious to the person of ordinary skill in the art to make the part disclosed in Karmaschek a stud as shown in Dash because a weld stud provides a recognized utility for a weld part as exemplified in Dash.

The acidic solution being ALODINE 2040 would have been obvious to use since it is a known commercially available acidic solution.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
